

Be Cool....Come to School!

Our Pre-K Cubs celebrate perfect attendance!

Make an Indoor Snowman With Your Child

Bring the magic of winter into your home with this indoor snow concoction!

Materials: Two boxes of cornstarch, one can of foaming shaving cream, a box or plastic container

- Empty the two boxes of cornstarch into the container.
- Add the can of shaving cream.
- Have your child mix together the cornstarch and shaving cream until it sticks together. You can now make three balls with the mixture to make a snowman.
- Find any toys or materials from the house to the container that your child can now play with. For example, your child might want to stir the mixture with a spoon.
- Put a lid on the container so that you and your child can play with the "snow" again tomorrow.

Open-ended question: What are your favorite things to do in the winter?

Judy Center Events

- **Pre-K & K Aquarium Field Trip** – Students will explore the aquatic world of wonder at the Baltimore National Aquarium.
- **Chicago Parent Program** – Parents and caregivers of children ages 3-5 learn how to support their children's learning and emotional growth.
